

MOLS uses exposed electrodes on a sleep cable that emit current through the sea water to produce magnetic and electric signatures. An acoustic generator produces broadband noise, similar to a ship's machinery or equipment, such

BENEFITS

- > Operates in target simulation mode and mine setting mode to maximize flexibility
- > ~~Find~~ Td(>)Tj0.2

MOLS SYSTEM SPECIFICATIONS

FEATURES

- > Adjustable magnetic and electric sleep output
- > Small storage footprint on mother ship when system is not in use
- >
