

MOLS uses e posed electrodes on a s eep cable that emit current through the sea ater to produce magnetic and electric signatures. An acoustic generator produces broadband noise, similar to a ship's machiner or equipment, such

BENEFITS

- Operates in target simulation mode and mine setting mode to maximize flexibility
- > F2n60 Td(>)Tj0.2

MOLS SYSTEM SPECIFICATIONS

FEATURES

- > Adjustable magnetic and electric s eep output
- > Small storage footprint on mother ship hens stem is not in use

5
