SATELLITE AND **PAYLOAD PROCESSING**

World-class commercial space operations ser ices at Vandenberg Air Force Base

L3Harris offers government and commercial customers a state-ofthe-art, cost-effective payload processing facility. It is equipped to satisfy the complex requirements for launch site satellite vehicle processing and assembly spacecraft testing, checkouts, fueling and integration operations.

A WORLD-CLASS PROCESSING FACILITY

L3Harris owns and operates an Integrated Processing Facility (IPF) to help both first-time and veteran space operators get missions into space safely and cost effectively.

Located at Vandenberg Air Force Base since 1995, the IPF has nearly 500,000 cubic feet of clean room space equipped to accommodate most spacecraft or payload processing needs. The facility includes generous administrative workspace for visiting processing teams. Experienced L3Harris personnel are on-site to facilitate all aspects of satellite vehicle final assembly, fueling, checkout and encapsulation.

The IPF's heavily reinforced concrete and steel construction provides excellent radio

ABOUT L3HARRIS SPACEPORT SYSTEMS

L3Harris offers comprehensive customer support based on extensive experience in requirements development, mission processing and execution of launch site satellite preparations. Serving both commercial and government users, L3Harris Spaceport Systems provides commercial satellite and payload processing to cost-conscious customers looking for solutions on California's central coast. L3Harris has experience in all aspects of launch site processing — from transportation to contamination control, spacecraft fueling to encapsulation and integration. Located at Vandenberg Air Force Base for more than 20 years, L3Harris Spaceport Systems ensures seamless integration with its mission partners, including the Western Range, Vandenberg Air Force Base and othetsc eet
