## **RECONFIGURABLE MULTIMISSION PAYLOAD**

Software-defined platform for satellite missions

RF mezzanine (Fs)

GHz

2

Reliability

.995 success (3 year) (LEO)

TID: 30 Krad(Si)

Radiation tolerance

SEL: <1 latchup/7 years
Heavy ions LET: >15 MeVcm²/mg

## **APPLICATIONS**

- > Small satellites
- > Hosted payloads

## **HIGHLIGHTS**

- Maximizes the value of smallsats and hosted payloads via a flexible, software-defined architecture
- > Is reconfigurable on orbit to meet changing mission needs
- Enables autonomous control and switching of mission applications in seconds
- > Supports user-developed mission apps with a software development environment and module library
