

L3HARRIS COMMUNICATIONS GRANT PROGRAM

L3Harris is committed to you throughout the grant funding process. From grant research and proposal development to application reviews, we've partnered with a team of grant coordinators to provide FREE customized assistance to help you fund your next communication system.

When applying for a grant to fund your system, it's most effective to encompass the entire life cycle of your system in three phases:

Plan and Design Phase

Is critically important since it influences the overall system cost. Short and long-term needs are determined and financial risks are reduced.

Procure and Install Phase

Is capital intensive for a short period of time and becomes a capital appropriation.

Operational Maintenance Phase

Involves the day-to-day functioning of the communications system. Funding sources are through the agency's budget and dedicated to daily operations.
