FIGH I G EHICLE (M30)

America's next-generation fighting vehicle

L3Harris is par, of a, eam of innova ive defense ind s r leaders kno n as Team L n . Led b American Rheinme, all Vehicles (ARV), Team L n has developed a f te gro indivehicle, o provide U.S. Arm ar gh ers j h, he advan ages, he need on, he ba, le eld.

AN INDUSTRY LEADING TEAM MODERNIZING FIGHTING VEHICLE TECHNOLOGY

The Army's next-generation combat vehicle (NGCV) must dominate on the future battlefield. To achieve this, L3Harris has exceeded the Army's modernization goals for superior mission systems, digital engineering and open-systems on XM30.

Lynx XM30 is built with industry leaders such L3Harris, Raytheon Technologies, Textron Systems, Allison Transmission and Anduril to produce a cutting-edge infantry fighting vehicle that both meets and exceeds the Army's NGCV requirements, and ensures the service can obtain the latest technology rapidly and cost effectively.
